1 online resource (iii, 38 leaves)

Language(s):

English

Abstract/Description:

One of the most immediate problems confronting the instrumental teacher of that presented by the string section of orchestra. In the years between 1925 and the number of string orchestras. In the schools of this country gradually dwindled in most small or medium size high schools in a great many of the larger ones it disappeared entirely. However, it is now encouraging that the increased emphasis being placed on the string program in teacher-training institutions is producing direct results in the development of a re-awakened interest in public school orchestra. In many schools where no string program existed a few years ago there is now evidence which shows that a return to orchestral study is well on its way to become an important curricular function.
