In This Article

13.1. Introduction

13.2. What are Constructions?

13.2.1 Types of Constructions

13.2.2 Argument Structure Constructions

13.2.3 Other Types of Constructions

13.2.4 Interaction of Multiple Constructions

13.3. Organization of Constructional Knowledge in CCG

13.3.1 Motivation

13.3.2 Networks and Inheritance Hierarchies

13.3.3 Frequency and Productivity

13.4. Differences between CCG and Other Strands of Construction Grammar

13.5. Conclusions

Notes

[-] Abstract and Keywords

This chapter focuses on Cognitive Construction Grammar, a plausible account of language by investigating the general network of language-specific constructions. It traces the principles and the architecture of CCG, and describes the The chapter also compares CCG with other strands of C and where they differ, and looks at the interaction of m inheritance hierarchies, as well as frequency and produ

Keywords: **CCG**, **language**, **cognitive principles**, **constructional inheritance hierarchies**

Hans C. Boas

Hans C. Boas is an Associate Professor in the Department of Linguistics at Texas at Austin. Before coming to Austin, he was a postdoctoral research fellow (http://framenet.icsi.berkeley.edu) at the International Computer Science Institute. He has published two monographs: *A Constructional Approach to Resultatives* (CSLI Publications, 2009) (Duke University Press, 2009), as well as four (co-)edited volumes and *Principles of Constructional Grammar* (Linguistic Society of America, 2009). He is the director of the Texas German Dialect Project (http://www.tgdp.org) and the recipient of the Prize for Germanic Linguistics (Institute for the German Language, Mannheim, 2008).
